

Platinum Solar Charger

With the Platinum Charger, you can charge your mobile gadgets and electronic devices. It has a stylish black finish and an effective 120mA solar panel. This Platinum Charger can easily be charged by sunlight, but it is also possible to charge the solarcharger by USB.

With the Platinum Charger you have always an extra back-up battery, so you are never out of power!

The Platinum Solar Charger comes with a 1800mAh internal li-ion battery and keeps the energy stored for a long time. It also comes with a LED status indicator, so you can see how much power is left in the charger.

The Platinum Charger is compatible with: mobile phones (including smartphones and iPhones), MP3/MP4 players, Navigation/GPS, E-book readers, Mobile game consoles etc. Most popular connectors are included to charge different brands of mobile equipment. The Platinum charger comes with a free protective cover.

You can print your (company) logo on the charger. So you can use it very good as a stylish business gift.
