

The Juicebar Pocket solar charger contains a powerful 1500 mAh high capacity battery that can be charged via a USB port or by exposing the solar cell to sunlight. You can also charge your devices directly from the sun via the solar cell.

The pack includes 12 connectors covering all popular mobile phones, handheld games consoles such as Nintendo DS and Sony PSP and MP3 players including iPods.

The Juicebar Pocket solar charger is incredibly small and light measuring just 11 X 40 X 93mm and weighing just 60 grammes.

The Pocket Solar features branding in several areas including the polished stainless steel laser etched back face, the gift bag and of course the packaging. All these points can be custom branded with any logo design required. The minimum order for this service is only 250 pieces. Please contact us for further information about custom branding options.
