

NoteLock

«Inject Security»

Where other locks attach, NoteLock forms a **BOND** to your laptop.

Key Features

- Automatically adjusts to the depth of your security slot by utilising the NoteLock patented design
- The patented spring loaded barrel ensures that the NoteLock will fit 99% of laptops on the market
- NoteLock is inserted into the security slot. With one easy turn two pre tensile steel springs are injected.
- The NoteLock body revolves around the internal lock assembly allowing the cable to rotate 360 degrees
- Removing the key, allows the internal tension spring to bond the NoteLock body to the laptop which is protected by the protective rubber cushion.
- Polycarbonate housing. Outer shell protects the laptop as well as work surface.
- Single handed operation
- NoteLock is the only customisable security lock on the market. Its protective housing and cable can be produced in any colour combination.
- NoteLock has the thickest and strongest cable on the market
- Lifetime warranty

Security features

- Patented pre tensible extending steal wing locking system
- 4 torsion bars with anti tamper fixings
- 20,000 keys to differ key combinations
- High security un-pickable disc tumbler lock as standard.
- Patented auto adjust mechanism for varying slot sizes
- 1.8 m, high tensible twisted steel security cable 5.5 mm thick with protective PVC casing
- 50 kg load capacity
